

PURPOSE:

d5, an Offshore Technology Conference (OTC) event, is designed to inspire leaders and innovators to address current challenges and drive exponential growth in the energy industry.

Themed “The Next Big Thing,” **d5** is unlike any other industry event. Game changing, forward thinking, global innovators will speak and lead group discussions that will spark creativity to identify the next big step for multiple industries, through technology, leadership practices and competitive advantages. The 2017 agenda and speakers will focus around *Impactful Innovation Throughout the Economic Cycle* and leave the audience members with a thoughtful starter kit to lead, develop and change the course for the way ahead.

d5 is designed as the perfect companion event for OTC, as it will expose attendees to disruptive technologies from other industries, help them build unique connections, and develop innovative solutions that can be applied to their business area.

WHEN: 5 May 2017 – 7:30am – 4:00pm

WHERE: Rice University, Jones School of Business, Houston, Texas

WHO WILL ATTEND:

Limited to 200 attendees from the offshore industry C-suite and technology executives, mid-level technical practitioners, R&D managers, and other executives, entrepreneurs, active young professionals, and academia

AGENDA:

This one day event will feature keynote presentations followed by 20 – 30 minute simultaneous breakouts for more intimate time with each speakers. The day will end with a wrap up panel made up of Oil and Gas executives who attended the daylong event discussing ways to connect the dots from what they learned at d5 to their companies and the industry as a whole. Attendees will get firsthand answers to questions they want to ask.
